All about Data...

資訊擷取 Data Capture

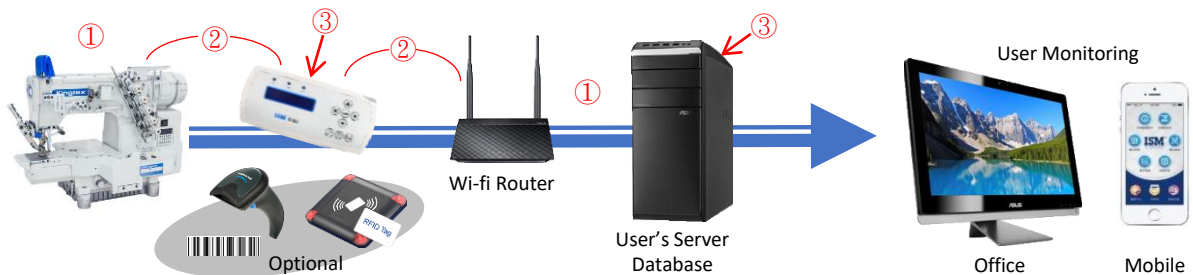

- CT動作定義
- Device: C-28(ISM)

資訊傳輸 Data Transmission

- Wi-fi
- Data Base/ Server

資訊運用 Data Using

- User's System
- PMS (ISM)

① 準備 Prepare

Machine Details
Network

② 連接 Connect

Machine → C-28
C-28 → Wi-fi Router

③ 設定 Setting

C-28 (Machine)
System (Server)

特點 / Features

1. 建置彈性 Great flexibility in construction

相容各品牌的電控系統，也可依客戶需求客製化設置感測器
Compatible with all brands' sewing machine controller. Moreover, sensors can be customized according to user's need.

2. 資訊安全 Information Security

數據傳到客戶的server，而不是外部的公有雲，客戶的營業機密不外流
The data is transmitted to user's server instead of the external cloud, business secrets will never be leaked.

3. 適用縫製情境 Sewing Scenario Applicable

因應各種情況，例如衣物尺碼改變時，可掃描條碼或感應RFID，快速切換
In response to various scenarios, such as changing size, just scan the barcode or RFID for quick switching.

CT Cycle Time : 彈性的設定 Practical Setting
